Lentink, a good team of professionals

Lentink is a professional organisation that actively deals with accountancy and taxation. Our aim is for our professionals to unburden our clients when it comes to business issues related to our profession. As our client you can rest assured that we are very skilled in our profession and that we provide a very high level of service.

We believe that our clients are best served by qualified, skilled professionals who are capable of providing clear advice on what course of action would be in the best interest of the client, and we always operate with that believe in mind. Our team operates based on knowledge and each and every one of them is keen to keep that knowledge current.

One of our core objectives is to provide support to our clients who are seeking to get the most out of their operations

Our services are primarily focused on supporting our clients in areas such as:

- preparing financial statements
- auditing of financial statements
- completing tax returns
- providing payroll services
- handling (online) accounting

These services form the basis of the services we provide our clients, which are focused on a wide range of issues that entrepreneurs are involved with in the management of their businesses. Our practical advice - which often takes future developments into account - is used by our clients to take the right steps to allow for future developments.

The regions in which we are most active include Gooi, Eemland and Flevoland in the Netherlands, but we are also actively involved with companies located elsewhere. We can also assist our clients on an international level.

We prefer to work for companies that are active in fields in which we have deep knowledge and with people we like and who trust us. This has been proven in the past to provide a sound basis for long-term collaboration, especially if you consider the close ties we have forged with many of our clients in the past.

Professional added value

One of our core objectives is to provide support to our clients who are seeking to get the most out of their operations. Added value is created with our clients in order to achieve the company's objectives. When our clients are successful we are successful.

Empathy with what you
love doing, your business,
your business processes
and your employees

We do this for clients who are active in many sectors of the small and medium enterprises, such as the healthcare sector, civil society organisation and local authorities.

We deliver added value through our team of specialists - which includes accountants and tax advisers - backed by a broad, yet deep knowledge of the matter and often with extensive experience gained through the years.

This in turn allows you to respond quickly.

Real time assistance

Entrepreneurs and their employees often do not have the expertise required to effectively implement regulations related to annual reports and taxation. For this reason companies often turn to experts to advise them on these matters. When you turn to an adviser, you expect good advice, especially since you are good in what you do.

We want to do our job well. We want to stand for quality, both in terms of technical aspects and cooperation with our clients. We want absolute empathy with what you love doing, your business, your business processes and your employees, but we also stand for clarity in communication.

Modern methods and techniques are applied whereby IT plays an important part to ensure work is done in an efficient manner and to provide complete comprehension of your systems.

Accountants and tax advisors work together to provide you with the best quality of these two knowledge areas

Multidisciplinary services

Accountants and tax advisors each have their own specific expertise and knowledge. Our services are therefore based on a multidisciplinary approach: combine accountants and tax advisors to provide you with the best quality expertise from these two knowledge areas. Financial statements are therefore in compliance with fiscal requirements, whereby optimum, acceptable fiscal behaviour is reflected in financial statements that are in compliance with relevant regulations. Irrespective of whether we are dealing with Dutch or international legislation (IFRS), we shall ensure full compliance with the requirements of laws and regulations.

Small but brave

Lentink is not a large office by any stretch of the imagination, but we opted for an office that is representative as a regional office. Our expertise allow us to assist our clients in a variety of business issues such as organisational issues, investment issues, economic studies, useful management reports, succession issues, valuation issues, fiscal planning, EDP reviews and buying and selling propositions. We believe that you do not need to be large to be able to deliver.

Your accountant and tax consultant

Are you looking for an accountant or a tax advisor? As an entrepreneur you know what you are looking for and why. It is therefore not necessary for us to explain what an accountant and a tax consultant do. It is more important to know who the person behind your advisor is and whether he/she has a thorough understanding of the

Financing and refinancing issues and comprehensive business planning processes are expertly guided by our people

business and whether he/she can deliver what is promised.

You need someone you can trust.

We have full confidence in the professional ability of our people to deliver solid and appropriate advice and accurate reports that are of real use to our clients and to provide them with the support required.

Audit

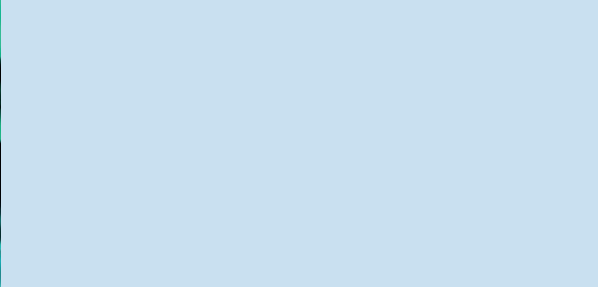

We are AFM approved for implementing statutory audits.

Payroll services

Our salary specialists are perfectly capable of handling payrolls for small and large enterprises. Our services are not limited to administrative duties as we can also assist with structuring your personal organisation. We can be your partner in the implementation of your HR policy.

Corporate finance

Our professionals have been trained in guiding entrepreneurs on acquisition issues and valuation issues, which is closely related to that. Refinancing issues and comprehensive business planning processes are expertly guided by our people and our existing relations with bankers, notaries and lawyers often promote efficient processes of negotiation and settlement. Knowledge of the people behind the company is essential in our client approach.

We also offer good opportunities for foreign companies in the Netherlands to guide Dutch or European operations

International

Our customers are becoming more and more active in selling or buying products and services on the global stage. We are members of Kreston International, which is a network of independent accounting firms in virtually all of the countries of economic significance in the world, to enable us to provide you with assistance abroad when you need expert guidance. We also offer good opportunities for foreign companies in the Netherlands to guide Dutch or European operations related to accountancy and fiscal aspects. We are registered with the Public Company Accounting Oversight Board (PCAOB), the US regulator, which allows us to can perform audits for US companies that fall under the supervision of SEC.

We want to be close so that you can continue to grow abroad!

A handshake

We are looking forward to making your acquaintance so that we can learn more about each other and to see how we can work together for mutual benefit.

You are always welcome!
